Subject: Overspray, Terminal 1
Date: Wednesday, September 11, 96 4:53PM

FYI. Received a phone call this afternoon from Emily House. Contractor spray painting Myrad vessel, "Green Mountain State," that is layberthed at T-1 has caused overspray to tenants. She did not know the contractor's name, but just wanted to alert us, in the event that we heard from anyone. She had a call into Mic Dorrance for some additional information.

I checked back with her late afternoon for an update. Myrad has accepted responsibility for the overspray and made contact with affected tenant, Thermo Press Laminate. If any calls come in to Risk, please refer them to Jerry Davis at 248-4299, who is Myrad's captain on board the vessel. Please keep a record of any calls received and also convey info to Emily. Thanks.
